Usina fotovoltaica de 20 MW do Cazaquistão + PPA da GOV

O Cazaquistão tem feito avanços significativos no campo da energia renovável, especialmente com o desenvolvimento de usinas de energia solar nos últimos anos. Os vastos espaços abertos e a luz solar abundante do país o tornam um local ideal para o aproveitamento da energia solar.

Um dos projetos mais notáveis de usina de energia solar no Cazaquistão é a Burnoye Solar Power Plant, localizada na região de Zhambyl. Com uma capacidade de 100 MW, é uma das maiores usinas de energia solar da Ásia Central. A fábrica cobre uma área de 164 hectares e é composta por mais de 380.000 painéis solares. Estima-se que a usina gerará cerca de 153 GWh de eletricidade por ano, o suficiente para abastecer cerca de 60.000 residências.

Outro projeto significativo de usina de energia solar no Cazaquistão é a Sakyt Solar Power Plant, localizada na região sul do país. Com uma capacidade de 50 MW, espera-se que a usina gere cerca de 96 GWh de eletricidade por ano. O projeto foi desenvolvido pela Eni, empresa internacional de energia renovável, e faz parte dos esforços do Cazaquistão para aumentar a participação da energia renovável na matriz energética do país.

O Cazaquistão estabeleceu metas ambiciosas para o desenvolvimento de energia renovável, com o objetivo de gerar 10% de sua eletricidade a partir de fontes renováveis até 2030. O vasto potencial de energia solar do país faz dele um participante importante na transição global para fontes de energia mais limpas e sustentáveis.

Um dos principais desafios enfrentados pelos projetos de usinas de energia solar no Cazaquistão é o clima rigoroso do país, com temperaturas extremas e ventos fortes que representam riscos potenciais à operação dos painéis solares. No entanto, os avanços na tecnologia de painéis solares e a implementação de sistemas de rede inteligente ajudaram a mitigar esses desafios.

De modo geral, os projetos de usinas de energia solar no Cazaquistão têm o potencial de desempenhar um papel crucial na transição energética do país, reduzindo sua dependência de combustíveis fósseis e contribuindo para um futuro mais sustentável. Com o investimento e o apoio contínuos do governo e do setor privado, o Cazaquistão está bem posicionado para se tornar um líder em energia renovável na Ásia Central.

Pontos-chave

Tipo de projeto: PV em terreno livre

Status: Pronto para construir

Localização: Zhetisu, Cazaquistão

Área total: 100 ha

Direitos sobre a terra: Arrendamento (incluído no preço)

Capacidade de energia instalada: 20,00 MW

Energia específica (aproximada): 1390,9 kWh/kWp

Conexão com a rede elétrica: 3 km da subestação KEGOC

Custos aproximados de EPC: 450.000 EUR / MW

PPA: GOV PPA por 14,50 KZT (0,0022\$ POR kW)

BUSINESS TYPE

Energia renovável

COUNTRY

Cazaquistão

BUSINESS ID

L#20240632

The information contained herein does not constitute an offer to sell or a solicitation of an offer or a recommendation to purchase securities under the securities laws of any jurisdiction, including the United States Securities Act of 1933, as amended, or any US state securities laws, or a solicitation to enter into any other transaction

The projected financial information contained in the Memorandum is based on judgmental estimates and assumptions made by the management of the target Company, about circumstances and events that have not yet taken place. Accordingly, there can be no assurance that the projected results will be attained. In particular, but without prejudice to the generality of the foregoing, no representation or warranty whatsoever is given in relation to the reasonableness or achievability of the projections contained in the Memorandum or in relation to the bases and assumptions underlying such projections and you must satisfy yourself in relation to the reasonableness, achievability and accuracy thereof.

By delivering this Memorandum, neither MergersUS Inc., nor its authorized agents are making any recommendations regarding the acquisition or strategies outlined herein. Interested parties shall exercise independent judgment in, and have sole responsibility for, determining whether an acquisition of the Company is suitable for them, and neither MergersUS Inc, nor its authorized agents have responsibility to, and will not, monitor the condition of interested parties to determine that an acquisition is or remains suitable for them. Among other things, suitability of an acquisition will depend upon an interested party's investment and business plans and financial situation.

This document is prepared for information purposes only. It is made available on the express understanding that it will be used for the sole purpose of assisting the recipients to decide whether they wish to proceed with a further investigation of the Proposed Transaction.

The recipients realize and agree that this document is not intended to form the basis of any investment decision or any other appraisal or decision regarding the Proposed Transaction, and does not constitute the basis for the contract which may be concluded in relation to the Proposed Transaction.

All information contained in this document may subsequently be updated and adjusted. MergersUS Inc. has not independently verified any of the information contained herein or on which this document is based. Neither the Company, nor its management or shareholders, nor MergersUS Inc. , nor any of their respective directors, partners, officers, employees or affiliates make any representation or warranty (express or implied) or accept or will accept any responsibility or liability regarding or in relation to the accuracy or completeness of the information contained in this document or any other written or oral information made available to any interested party or its advisers. Any liability in respect of any such information or any inaccuracy in or omission from the document is expressly disclaimed.
